

FIND YOUR SIZE

We recommend printing this sheet in A4 format and selecting “real size” in the printing options. If you are consulting from a mobile phone, we recommend that you turn your screen sideways. Make sure that the scale is precise by using the line below as a reference: its length should correspond with the length of a credit card (86 mm).

You may then follow these steps to find your size:

- Cut the measuring tape below and wrap it loosely around your wrist.
- Leave enough room between your wrist and the tape to slip your index finger through.
- If the measurement falls between two sizes, your wrist size corresponds with the larger size (In the example opposite: 167 mm, for a wrist size of 170).

In order to select the correct size for your Chaumet bracelet, carry the wrist size over to the equivalence table on the next page.
